

The Pennsylvania Society of Professional Engineers

Philadelphia Chapter

Delaware Valley
Engineers Week council

Outstanding Engineering Achievement Award Committee Award Program Guidelines

1. The nomination description must focus specifically on the engineering aspects of the project and demonstrate how the project meets the selection criteria. The selection criteria, in order of importance are:

- 1) Demonstrate engineering challenges and innovative solutions
- 2) Demonstrate the importance of the engineering profession to society
- 3) Demonstrate a clear and tangible benefit to the Delaware Valley Region

2. Project must be designed, manufactured or constructed in the Delaware Valley Region. The Delaware Valley Region consists of the following counties: *Pennsylvania:* [Philadelphia](#), [Delaware](#), Chester, [Montgomery](#), and Bucks *New Jersey:* Camden, Salem, Mercer, Burlington and Gloucester.

3. Project design or construction must be substantially completed, or manufacture started in 2007. In the event that the entry is for a component of a larger project, only the component design or construction need be substantially complete in 2007.

4. Projects may only be entered once. No project may be re-entered in following years.

5. There is a limit of one nomination per engineering discipline by any one submitting entity (such as an owner, engineer or contractor.)

6. Nomination applications are limited to the one page form, and additional pages as required for further description. All supporting information must be unbound/unstapled, and easily reproducible. It is strongly requested that the entire file (of application and supporting information) also be provided in a PDF format to facilitate review by the judges during the short-listing review.

7. Nomination forms shall be completed and returned no later than November 16, 2007 (the date identified on the Nomination Form.)

8. Selected projects, if physically located locally, are requested to be available for a site tour in the spring of 2008.

Founded April 2, 1934

9. Selected projects agree to support the [Delaware Valley Engineers' Week Council](#) in public relation efforts, including but not limited to submission of project write ups and project photographs suitable for press.

10. Firms that nominate projects for this program will be notified by email as to whether their projects were short-listed. At that time, information will be provided as to the agenda for the PSPE December Meeting. Notification of short-listed projects will be provided so as to allow sufficient time for presenters to prepare, and is anticipated to be on or before November 21, 2007.

11. Adequate time will be allotted for short-listed teams to present their projects. The actual length of presentation will be not less than 10-minutes, with additional time to allow for set-up and breakdown of projectors and/or other A/V aids, and for distribution of any handouts. It is recommended that PowerPoint, or a similar product should be utilized in the presentations.

12. A panel of judges will determine projects that will receive the Outstanding Engineering Achievement Award, and awards for individual disciplines.

13. Firms representing award winning projects will be asked to display their projects at the Proclamation Luncheon* on February 15, and the Engineer's Week Banquet* on February 23, 2008. Organizations are asked to show their support by participating in Engineer's Week Activities. This may include attendance by employees of firms representing each project at the Luncheon and Banquet.

* The Proclamation Luncheon and Banquet are hosted by the [Delaware Valley Engineers' Week Council](#). Tickets to these events may entail an additional fee.
